What does the human body look like inside?

READ

Inside, the body is full of parts that work together. The brain is in the head. The heart and lungs are in the chest. The stomach, liver, intestines and kidneys are in the belly. Bones hold everything up and skin covers the whole body.

1 Which part is it? Use the words in the box.

Right lung

Brain

Heart

1. It sits inside your head, protected by the skull. It thinks, remembers, feels and sends messages to the whole body.
2. It sits in the middle of the chest, a little to the left. It beats nonstop to send blood around the whole body.
3. Your lungs fill with air when you breathe in. The right one is a little bigger than the left.

2 Match each part to what it does. Write the letter.

- ☐ 1. Eyes
- ☐ 2. Liver
- ☐ 3. Stomach
- ☐ 4. Intestines

- A. Absorbing nutrients
- B. Cleaning the blood and storing energy
- C. Seeing
- D. Starting to digest food

3 True or false? Write T or F.

- ☐ 1. **Brain:** breathing
- ☐ 2. **Heart:** pumping the blood
- ☐ 3. **Right lung:** running the whole body
- ☐ 4. **Pancreas and spleen:** helping digestion and defense

4 Think and answer

What is the largest organ in the body?

Spin it in 3D and read more
